

Taky Allah E. Gad

Full-Stack Web Developer (Node.js / React / MERN)

+20 109 713 2814 | tkyehab@gmail.com | [linkedin.com/in/taky-gad](https://www.linkedin.com/in/taky-gad) | github.com/takyEhab

PROFESSIONAL SUMMARY

Full-stack web developer with hands-on experience across the MERN stack, building, deploying, and maintaining production web applications end-to-end — from responsive React/Vue frontends and Node.js/Express REST APIs to Linux server deployment (Nginx, SSL, DigitalOcean) and cloud hosting (Vercel). Comfortable across the full development lifecycle, including version control, automated deployment pipelines, and basic mobile development with React Native.

TECHNICAL SKILLS

- Languages: JavaScript, Python, C, SQL
- Web Development — Frontend: React.js, React Native (mobile development), Vue.js, Redux, Tailwind CSS, Bootstrap
- Web Development — Backend: Node.js, Express.js, Django, REST API design
- Databases: MongoDB, MySQL, PostgreSQL
- Infrastructure & DevOps Practices: Linux, Nginx, Apache, DNS, SSL, DigitalOcean, Git/GitHub, CI-friendly deployment workflows (Vercel continuous deployment)
- Other: JWT Authentication, Socket.io, Joi Validation, Role-Based Access Control (RBAC)

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer — Delivery Hub Platform (Food Delivery)

2026 (Inactive)

Independent client engagement — local fish store (seafood retail & delivery), solo-built end-to-end

- Designed, built, and deployed a full-stack web development solution: a REST API and React operations dashboard supporting day-to-day delivery operations for a local fish store.
- Engineered the backend with Node.js/Express and PostgreSQL, applying JWT authentication, bcrypt password hashing, and Joi request validation to keep the system secure and reliable.
- Implemented 2 role-based access levels (Owner / Driver) and end-to-end order lifecycle tracking, giving owners real-time visibility into drivers, customers, and active orders.
- Deployed frontend and API independently via Vercel, adopting a continuous deployment workflow so updates shipped automatically without manual server work.

IT Trainee — Alexandria Water Company (AWCO)

Aug 2026

- Completed structured IT department training focused on Software, with additional exposure to Network & Infrastructure and Digital Services teams.
- Gained practical exposure to enterprise IT operations, internal tooling, and support workflows within a large public-sector utility.

Freelance Full-Stack Developer — Waraqa (Online Learning Platform)

2022

Independent client engagement — online learning platform (took over and rebuilt existing codebase)

- Took over and continued development of a full-stack online learning platform built with Vue.js, Node.js, Express.js, and MongoDB, improving on the existing codebase.
- Implemented JWT-based authentication and authorization, and built responsive, mobile-friendly UIs with Tailwind CSS.
- Provisioned and managed the production environment end-to-end — Linux server setup, Nginx reverse proxy, DNS configuration, and SSL — deploying on DigitalOcean.
- Profiled and optimized rendering and API request patterns to reduce unnecessary re-renders and speed up page load times.

Freelance Developer — Python Automation & Browser Tools

2020 – 2022

Independent client engagements — data collection and browser-workflow automation

- Built Python web scrapers to automate client data collection and ongoing monitoring tasks.
- Developed JavaScript Chrome extensions that automated repetitive client browser workflows, saving manual effort.

PROJECTS

DevLink (React, Node.js, MongoDB)

2025 – 2026

- Built a developer-networking web application from the ground up, including authentication, user profiles, project sharing, and real-time chat.
- Developed the React + Tailwind CSS frontend and the Node.js/Express + MongoDB API, integrating Socket.io for real-time messaging between users.

Live: dev-link-frontend-mu.vercel.app | Repo: github.com/takyEhab/DevLink

Portfolio Website

- Designed and built a personal portfolio site with React, Vite, and Tailwind CSS to showcase web development projects and skills.

EDUCATION

Alexandria University — Bachelor of Business, Management Information Systems (MIS)

Graduation: Expected 2028

- Coursework: Database Systems, Programming, Business Analytics, Information Systems

CERTIFICATIONS

- ALX Software Engineering Certificate — ALX Africa (2025) | CS50 & CS50W — Harvard University, via edX
- IT Department Training Certificate — Alexandria Water Company (AWCO) (Aug 2026) | ICDL Certificate
